

Outreach Example

The Arthritis Society, South West Region offers therapeutic groups as an education series to help participants manage their arthritis. The events are hosted from a London LTCH OTN site (McCormick Home); and participants (people with arthritis) are located at 4 or 5 OTN sites across the South West and Erie St. Clair LHIN areas. The Arthritis Society provided samples of the instruction for the OTN sites that who support the participants and tips for the presenters at the host site. They also provided a copy of a research report they had students prepare for them as they began planning the series.
